

Scorpion Starter Kit

The perfect introduction for jump-starting your own Scorpion Vision solution

Including Scorpion Vision Software[®] and two days training

Scorpion Starter Kit – contains everything you need for bringing your first Scorpion Vision project to life. The kit includes a Scorpion Enterprise software license and a 2 days training course where you learn how to use **Scorpion Vision Software[®]**. A standard and configurable user interface paired with innovative and easy-to-use imaging tools quickly enables participants to plan, implement and test complete Scorpion applications ready to communicate with control systems. Bring your own notebook and return to the production site with a framework well suited for your particular real-world application. No programming skills are required, but general engineering knowledge and modest experience with photography issues such as light assessment and lens manipulation will smooth the start up phase.

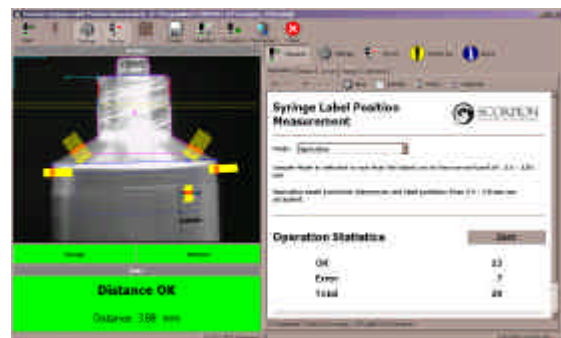

Scorpion Starter Kit starts at 3.750 EURO

Scorpion Vision Software[®] - one solution for all vision systems.

Independent - for configuration of vision systems built upon standard PCs and Windows. Interface with plug-ins; dynamic link libraries (DLLs) and Active-X. Complete support for DirectX and Firewire Imaging.

Flexible - complete range of robust and easy to use vision tools, out of the box rs-232, tcp/ip and opc support, configurable data and image logging support combined with unique python scripting capability.

Cost Effective - no programming, step by step adaption to changing demands, remote support and off-line verification of modifications ensures the lowest development, installation and maintenance cost.

Scorpion solves vision tasks within **robot vision, label inspection, assembly verification, color identification** and **gauging**. Demonstration versions are available – ask for a demo cd.

Product type no	Product	Cameras	Lens	Extra accessories	Calibration grid	Unibrain Fire-I SW v3.0	Price in EURO
